PROFESSIONAL ATHLETE & TOKENOMIC ALIGNMENT AGREEMENT

Version 1.0.2-Beta (Simulation & Testing Framework)

CRITICAL TESTING NOTICE: This document is a placeholder dummy contract generated specifically for smart contract testing, cryptographic verification dry-runs, and Overleaf rendering compilation tests. It holds no legal validity.

This Professional Athlete & Tokenomic Alignment Agreement (the "Agreement") is entered into and made effective as of the Effective Date, by and between:

THE CLUB:

MetaFootball DAO LLC, operating under smart contract registry address: 0x71C7656EC7ab88b098defB751B7401B5f6d8976F (hereinafter referred to as the "Club").

THE ATHLETE:

John Doe (Test Player Profile), associated with non-custodial verification public key: 0x2ae0C2FF1CD36F76D889a7D14B3E03487DEFa6A2 (hereinafter referred to as the "Athlete").

1. Engagement & Smart Contract Binding

The Club hereby engages the Athlete to perform services as a professional football player within the MetaFootball Decentralized League ecosystem. By signing this document physically or via digital multisig, both parties mutually agree to bind their operations to the governance framework executed by the MetaFootball Core Smart Contract Pipeline.

2. Remuneration & Tokenomic Distributions

The remuneration package for the Athlete is split into stable-denominated on-chain allocations and algorithmic performance tokens. Total baseline payout functions follow the specified distribution metric:

$$R_{\text{total}} = \text{BaseUSDC} + (\omega \times \text{Goal}_{\text{bonus}}) + (\sigma \times \text{Governance}_{\text{MFT}})$$

Where variables correspond to the verified real-time match data oracle feed.

Compensation Component	Asset / Token	Frequency / Trigger	Testing Value
Base Salary	USDC	Bi-Weekly Epoch	15,000 USDC
Performance Incentive	MFT	Per Goal Scored (ω)	500 MFT
Governance Allocation	vMFT	Quarterly Milestone (σ)	2,500 vMFT

3. Image Rights & Digital Assets (NFTs)

The Athlete grants the Club exclusive rights to use, render, and generate multi-tier digital collectibles (Non-Fungible Tokens) incorporating the Athlete's name, likeness, and digital avatars. All primary sales revenue generated through the official marketplace shall be automatically split 70/30 via smart contracts.

4. Governance and Dispute Resolution

Any disputes arising from performance metrics or technical oracle failures shall be submitted directly to decentralized arbitration protocols governed by Kleros or a designated multi-signature dispute DAO panel.
